

INDUSTRIAL MECHANIC OUTSIDE OF CONSTRUCTION DECREE

Job status: permanent, temporary, casual.

Shift: day, evening, night, weekend and on call.

Possibility of overtime.

Brief description of the position

SDX Mécanique, a specialist in mechanics and industrial maintenance, is looking for Industrial Mechanics and Industrial Mechanic Apprentices, to support our local and regional projects. As part of our deployment of teams of workers during planned shutdowns, the work consists of the assembly of industrial equipment, maintenance, repair and modification of production equipment and machine tools, as well as material handling equipment.

Job Description

- In the performance of his/her duties, the Pipe-fitter is responsible for the following:
- Carry out repairs to stationary industrial machinery and mechanical equipment and
- install mechanical equipment.
- Be able to read basic plans, assembly drawings and written instructions.
- Analyze and solve problems.
- Perform preventive maintenance.
- Perform basic welding, cutting and piping as required.
- Operate material handling equipment required for maintenance of machinery and equipment.

Required knowledge and skills

- Have a DEP in mechanics.
- Have a minimum of relevant experience.
- Hold a valid ASP Construction card.
- Intermediate level of written and spoken French. English is an asset.
- Sense of autonomy and efficiently manage priorities.
- Have experience working with assembly parts.
- Ability to drive a forklift (an asset).
- Willingness to work overtime - upon request.
- Know and respect (at all times) the rules related to health and safety at work.
- Have a class 5 driver's license.
